Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Status

- 1) ☒ Responsive to communication(s) filed on 02 November 2004.
- 2a) ☒ This action is **FINAL**. 2b) ☐ This action is non-final.

DETAILED ACTION

Claim Rejections - 35 USC § 112

1. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

2. Claim 17 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.
3. Claim 17 recites the limitation "the seal" in line 8. There is insufficient antecedent basis for this limitation in the claim.

Claim Rejections - 35 USC § 103

4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

5. Claims 17-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Lodge et al (US518859) in view of Brastad (US4267420).

Lodge et al discloses a method for producing foods which may be cooked in the presence of microwave energy comprising the steps of selecting a friable food, compressing the food into a pellet, coating the surface with a microwavable heatable substance (abstract; column 6, lines 17-20), the food product is flour and starch (column 3, line 40-41) with water (column 4, line 8), flour is from the group consisting of potato, wheat, corn, bran, rice or combinations thereof

Art Unit: 3742

(column 3, lines 48-60), flavoring combined with pellet (column 4, lines 40-44), grinding food product into a paste and mixing with water (column 4, lines 60-62; column 5, lines 6-14), coating pellet with oil which is a non-starch food product (column 5, lines 25-38), separating and microwaving the pellets (column 5, lines 49-58; column 6, lines 17-20), container allows the passage of air but provides a moisture and heat barrier (column 5, line 49-58), container separates pellets (column 5, lines 49-58), and compressing the pellet within an extrusion (column 5, lines 6-23). Lodge et al discloses all of the recited subject matter except a breathable, polyester, heat resistant cover having a top and bottom layer with a thickness between 70-100 gauge, and an adhesion seal. Brastad discloses a breathable, polyester, heat resistant cover having a top and bottom layer with a thickness between 70-100 gauge (column 3, lines 42-51; column 4, lines 6-24), and an adhesion seal (column 4, lines 6-9). It would have been obvious to one of ordinary skill in the art at the time the invention was made to have included the cover and adhesion seal of Brastad in the method of Lodge et al because, a breathable, polyester, heat resistant plastic cover allows the food item to attain the desired browning and crispening.

Allowable Subject Matter

6. Claims 14-16 are allowed.

Conclusion

7. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO**

Art Unit: 3742

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
